# Legal Disclaimer

This Whitepaper for Bitcoin Gold on Solana is intended for informational purposes only and does not constitute a prospectus or an offer of investment in any jurisdiction. The \$BTGS token is a digital asset operating on the Solana network and does not represent shares, ownership rights, or any claim to dividends or profits from any legal entity. Participation in this ecosystem is strictly voluntary and should not be construed as a solicitation for the purchase of securities or regulated financial instruments.

Prospective participants must acknowledge that digital assets are subject to high volatility and significant technical risks, including the potential for total loss of value. The development team and contributors shall not be held liable for any financial losses, Solana network failures, or user errors in wallet management. Any forward-looking statements regarding project roadmaps or future performance are speculative in nature and subject to change without notice based on market conditions or technical developments.

It is the sole responsibility of the user to ensure compliance with all applicable laws and tax regulations in their country of residence. This project is provided on an "as-is" basis without warranties of any kind. Users are strongly encouraged to conduct their own thorough research (DYOR) and consult with legal or financial professionals before engaging with the Bitcoin Gold on Solana ecosystem.

# Introduction

Bitcoin Gold on Solana (\$BTG) is an innovative initiative that merges the robust fundamentals of the "Digital Gold" narrative with the cutting-edge technological prowess of the Solana blockchain. This project aims to overcome the scalability barriers and high transaction costs often associated with traditional crypto assets by offering a solution that is lightning-fast, cost-effective, and highly scalable. By operating within the Solana ecosystem, \$BTG serves not only as a scarce store of value but also as an agile asset ready for seamless integration with various DeFi protocols, providing a frictionless user experience for a global community that demands Bitcoin-grade security paired with the efficiency of future-proof technology.

**\$BTG**

# **\$BTG Technology**

Bitcoin Gold on Solana (\$BTG) leverages the robust infrastructure of the Solana blockchain, utilizing a unique consensus mechanism known as Proof of History (PoH). This technology acts as a cryptographic timestamp, allowing the network to automatically verify the sequence of transactions without the need for time-consuming validator coordination. As a result, \$BTG can achieve processing speeds of over 65,000 transactions per second, providing an efficiency that far surpasses the traditional Proof-of-Work mechanism used by the original Bitcoin.

As a digital asset utilizing the SPL Token standard, \$BTG excels in interoperability and functionality within the DeFi ecosystem. This technology enables near-instant transaction finality within milliseconds and seamless integration with various decentralized exchanges (DEXs) and lending protocols on the Solana network. This architecture ensures that \$BTGS is not merely a store-of-value asset but also a highly liquid financial instrument that can be moved with minimal gas fees.

The technological efficiency of \$BTGS is further supported by the Sealevel runtime engine, which allows for large-scale parallel processing of smart contracts. Through this method, the network can handle thousands of instructions simultaneously without causing congestion, ensuring that transaction costs remain stable and minimal even during peak market activity. By combining this stateless architecture with high scalability, Bitcoin Gold on Solana delivers a modern digital gold solution ready for the future demands of the global economy.

# Tokenomics

Token Name : Bitcoin Gold On Solana (\$BTG)  
Total Supply : 21.000.000 (21M)  
Fair Launch On : Solana (\$SOL)

**CA : AFWiRT7KyYLGxt845nbXufX6UW5Fa1RMVZvTSrdEM1p6**

## Token Allocation

- Community & Ecosystem (40%)
- Treasury & Development (20%)
- Team & Advisors (15%)
- Strategic Partnerships (10%)
- Liquidity & Exchange Listings (15%)

## Token Utility

Bitcoin Gold on Solana (BTG) is designed as a multifunctional asset that integrates the scarcity value of digital gold with practical utility in the modern blockchain ecosystem. As a medium of exchange, BTG enables global value transfers with high speed and near-zero transaction costs, making it an ideal solution for daily payments or large-scale asset transfers without technical hurdles. Furthermore, as an SPL standard token, BTG provides holders with direct access to participate in various Decentralized Finance (DeFi) protocols on the Solana network, ranging from liquidity provision to using the asset as collateral to generate yields.

Beyond financial aspects, BTG also functions as a governance instrument that empowers the community to shape the future direction of the project. Through a Governance mechanism, every token holder has voting rights in strategic decision-making processes, such as the development of new features or the management of community initiatives. By combining financial utility with administrative voting rights, BTG creates an inclusive ecosystem where asset value grows in tandem with active participation and community-driven infrastructure development.

# ROADMAP

## Phase 1: Genesis & Infrastructure (Q4 2024 - Q1 2025)

- Token Deployment: Official launch of the BTG smart contract using the SPL standard on the Solana network.
- Security Audit: Smart contract security audit by third-party firms to ensure user asset protection.
- Website & Whitepaper Launch: Publication of official technical documentation and digital platforms.

## Phase 2: Liquidity & Accessibility (Q2 2025)

- DEX Listing: Initial liquidity launch on major Solana decentralized exchanges (e.g., Raydium, Jupiter).
- Partnership Program: Establishing ties with digital wallet providers and asset trackers (CoinMarketCap & CoinGecko).
- Staking Platform: Launch of an internal dApp to provide yields for loyal BTG holders.
- CEX Expansion: Initiating the listing process on tier-2 centralized exchanges to enhance global accessibility.

## Phase 3: Ecosystem Expansion (Q3 2025)

- BTG Governance Portal: Launch of a voting platform for token holders to participate in strategic decisions.
- DeFi Integration: Integrating BTG as a collateral asset in major Solana-based lending protocols.
- Strategic Partnerships: Collaboration with payment gateways for real-world BTG transaction use cases.
- Global Awareness Campaign: Marketing expansion into key regions including Asia, Europe, and the Americas.

## Phase 4: Global Maturity (Q4 2025 & Beyond)

- Institutional Integration: Attracting institutional investors through secure custody infrastructure.
- Cross-Chain Bridging: Developing secure bridges to expand BTG liquidity to other blockchain ecosystems.
- Governance Full Decentralization: Full handover of protocol parameters to the community via DAO.
- Sustainable Ecosystem: Continuous innovation to ensure BTG remains the most efficient digital gold standard.

# TEAM

## **ABPX Team**

The Bitcoin Gold on Solana (BTG) project is developed and managed by a multidisciplinary team of professionals with deep expertise in blockchain technology, digital commodities, macro-financial systems, and Web3 innovation. The team's diverse experience ensures that BTG is positioned not only as a powerful digital store of value but also as a platform that promotes transparent governance and efficient financial utility through the Solana network.

## **Core Team**

- Marcus V. Thorne – Founder & Chief Strategist: A visionary entrepreneur with over 15 years of experience in physical gold markets and digital asset innovation. He leads the strategic vision of bringing "Digital Gold" fundamentals into the modern blockchain era.
- Aurevion – Chief Technology Officer (CTO): A blockchain engineer and former Solana core contributor. Expert in smart contract architecture, SPL protocol efficiency, and network scalability to ensure the security of BTG assets.
- Veltrix – Chief Operating Officer (COO): Background in fintech strategy and asset management. Oversees institutional partnerships and global ecosystem integrations to ensure BTG's operational scalability.
- Lunara – Head of Tokenomics & Governance: Specialist in token economic design and decentralized governance systems. Responsible for BTG ecosystem stability and ensuring fair community participation mechanisms.
- Eryndor – Head of Community & Growth: Expert in blockchain marketing and global brand development. Leads expansion campaigns to build a robust global community of BTG holders.

## **Advisory Board**

- Prof. Julian Vance – Blockchain Security Advisor: Renowned researcher in distributed system security and smart contract auditing on high-throughput networks.
- Michael Chang – Digital Asset Strategy Advisor: Former investment strategist specializing in the correlation between traditional assets and cryptocurrencies.
- Anya Petrova – Legal & Compliance Advisor: Global digital policy expert ensuring BTG ecosystem compliance with international virtual asset regulations.

\$BTG

# Conclusion

Bitcoin Gold on Solana (BTG) is more than just a token; it is an evolution in how we perceive, store, and transfer value in the digital age. By merging the time-tested philosophy of asset scarcity with the speed and efficiency of Solana's blockchain technology, BTG addresses the challenges that have long hindered the mass adoption of crypto assets as everyday financial instruments. We have built a foundation that is not only technically secure but also inclusive and future-ready.

Backed by an experienced team, community-driven governance, and deep integration into the DeFi ecosystem, BTG offers a unique value proposition: a stable store of value that is also highly liquid. We invite investors, developers, and blockchain enthusiasts to join us on this journey—transforming the vision of digital gold into a functional, scalable, and sustainable reality for the global economy.
